

Your Credentials Have Been Compromised.

Now What?

The reality is, once employee credentials or sensitive data is **exposed on the Dark Web, your information cannot ever be completely removed or hidden.** You cannot file a complaint or contact a support line to demand your data be removed. **Once identified your company should take immediate action and appropriate steps** to correct and minimise the risk and potential damage.

Alert all employees

Establish strict policies

Change all passwords

Identify, understand and learn from past mistakes or failures, and adopt a more proactive and preventative approach to your business' cyber security strategies moving forward.

Did you know **81% of breaches** are caused by credential theft?

Proactively Protect Your Business with Cyber Security Best Practices.

Implement **multi-factor authentication**

Ongoing **security awareness training**

Monitor for breaches and threats

Invest in **cyber insurance**

Consider a **password management** solution

Perform regular **risk assessments**

Back up everything

Did you know **60% of SMBs** will go out of business within 6 months of a cyber incident?

We Go into **The Dark Web** to Keep You Out of It.

Want to know if your company's credentials are on the Dark Web? **Request your free live Dark Web scan today.**
