Digital Transformation

While searching for the best migration path for hosting Sage 200 in the cloud, we couldn't find a straightforward, pain-free method for our clients. So we built the ideal solution.

ISO27001 certified and a Microsoft Gold Cloud Platform Partner (Azure), provisioning cloud with Paradise gives you the benefit of years of Sage Cloud technical know-how. We work hard to give you the simplest route to migrate your Sage 200 customers to the cloud, providing the best possible experience, both during and following migration.

We ensure the cloud migration aligns with your customers' entire software environment, not just Sage 200. By addressing all their business needs, we create the right future-proof hosting environment. This includes Sage add-ons like Sicon and Draycir, any bespoke modules, industry specific software programs and office apps like Microsoft 365.

That's why we are trusted by Sage Partners throughout the UK to provide discreet hosting solutions for their customers.

CHOOSING THE RIGHT CLOUD PARTNER FOR YOUR SAGE 200 CUSTOMERS

Collaborating for success

We understand the complexities and challenges of Sage cloud migrations and do the hard work for you. Our hosting isn't restricted to B-series virtual machines or one-size fits all portals. We have flexibility across a range of servers and platforms to suit your customers' needs and budget.

Opt for anything from simple secure file storage to complete server and desktop virtualisation. Migrate any business applications, including Sage 200 or other ERP solutions. Add industry-leading productivity tools like Microsoft 365 for a best-in-class employee experience, providing an end-to-end business solution to transform your Sage customers' working environment.

Embrace new ways of working. Give your customers a choice of hosting options:

1. Azure Hosting
2. Professional Hosting
3. Essential Hosting

"Great discoveries and improvements invariably involve the cooperation of many minds."

Alexander Graham Bell

Paradise Azure Hosting

Trusted cloud, secure from the ground up

Microsoft Azure features an ever-expanding set of cloud services to help organisations meet business challenges. Its integrated cloud-computing services include analytics, computing, database, mobile, networking, storage, and web apps. You'll be up and running quickly with a scalable, cost-effective solution.

- **Secure:** Multilayer security trusted by enterprises, governments, and start-ups
- **Scalable:** Seamlessly scale up or down according to business cycles, only pay for what you need and use
- **Compliant:** The most comprehensive set of compliance offerings of any cloud provider
- **Future-ready:** Continuous innovation from Microsoft supports your company's ongoing development

- **Ideal for medium to large enterprises, scalable for any number of users**
- **Unlimited storage and performance options**
- **Perfect for hosting all your business data and software applications**

Over 95 percent of Fortune 500 companies trust their business on Microsoft Azure. Speak to us about deploying your applications and solutions in Azure. Call us today on 01604 655900 or email hosting@paradisecomputing.co.uk

Paradise Azure Virtual Desktop (AVD)

A secure remote desktop experience with the latest generation of remote desktop services

Allows your customers to access their desktop and applications from virtually anywhere and help secure their employee and company data by storing in Azure rather than local desktops.

Azure Virtual Desktop (formerly Windows Virtual Desktop) enables secure remote work with the familiarity and compatibility of Windows 10 and Windows 11, giving employees the same experience as on their local desktop or laptop – whether they're managing their inbox with Outlook, sharing files in OneDrive or collaborating with colleagues on Microsoft Teams.

Your customers receive the best virtualised experience, with scalable multi-sessions, and save costs by only paying for what they use. AVD can be used with existing eligible Microsoft 365 or Windows per-user licence.

- **Ideal for any size business**
- **Speed, scalability and familiarity with multi-session windows 10 or 11**
- **Make the most of Azure Hosting with a highly secure and globally accessible workspace with the added advantage that applications can be run remotely from users' machines**

Paradise Professional Hosting

Cloud flexibility and security

Utilising a high standard data centre, Paradise offers a mid-tier hosting solution for a simple and cost-effective managed cloud solution.

If advanced cloud benefits are not required, our Professional Hosting provides excellent value and performance with a reliability record of over 99% availability.

Paradise Professional Hosting is the first choice for customers with a simple, predictable workload for between 5 and 15 users.

- **Ideal for small and medium enterprises with 5 - 15 users**
- **Provides many of the benefits of larger hosted platforms but at a lower cost**
- **Predictable fixed costs for all aspects including platform, bundled software and Paradise's high-quality technical support**

Paradise Computing is ISO27001:2013 Certified. This Information Security Management System (ISMS) assures you that your assets are protected from misuse, corruption or loss. Secure your critical data, call us on 01604 655900.

3

Paradise Essential Hosting

Cost efficient cloud

Using Paradise's in-house data centre, Essential Hosting represents an ultra-low-cost hosted platform for customers seeking the most economical solution.

A bare-bones hosted solution based on a single-site but still boasting ISO27001 certification, on-site generator power backup and dual internet connections from more than one supplier.

With hosted Windows Server solutions, Essential is ideal as a testing platform, archive storage or backup.

With experience in hosting solutions since 2004, you can rely on Essential hosting for your customers with non-critical business workloads.

- **Ideal for smaller enterprises with up to 5 users where cost is a key factor**
- **A basic hosted solution providing cloud-based Windows operation**
- **With good performance, low start-up costs and no early termination penalties, this is a flexible and efficient step towards full cloud hosting**

Reimagine Workplaces

BUILDING SMARTER BUSINESS THROUGH COLLABORATION

Why Paradise as your Cloud Partner?

Migrating Sage to the cloud enables you to offer an additional service to your Sage customers, working as their digitisation partner without any requirement for additional technical knowledge or accreditation. It also provides an additional service/revenue stream opportunity for you.

Paradise's friendly and experienced technical team focus on helping you get the best for your customers' business requirements. And rest assured, as your partner, we deal directly with you at all times and never contact your customers, unless you specifically ask us to.

-  **Safe secure hosting with choice of platforms to suit every budget**
UK based data centres and support. Our hosting is not restricted to B-series virtual machines or one-size fits all portals. Our choice of platforms ensures your Sage customers get the best in reliability, security and availability to meet their budget.
-  **Your customers use their current Sage 200 licence**
No need for your customers to start a new contract or change their existing Sage licence.
-  **Future-proof compatibility**
Host all your customers' software, including Sage add-ons, i.e. Sicon, Draycir, Datalinx, Eureka, bespoke modules, plus industry specific software, third party applications and Microsoft 365.
-  **Simple pricing**
Easy per user pricing through our partner agreement. Also minimise your customers' ongoing IT expense burden with no upfront hardware costs, server maintenance or upgrades.
-  **Scalable customised deployment**
One size doesn't fit all, that's why we offer various configurations to suit your customers' individual business. Get the right cloud solution for their different needs and budget.

As a Sage Partner since 1987 and deploying Sage solutions in the cloud since 2004, Paradise Computing is trusted by Sage Partners throughout the UK to provide discreet hosting for their customers.
