

BREAKING BARRIERS IN EDUCATION WITH MICROSOFT SURFACE

Set your organisation up for success
with our first-class support.

THE BENEFITS OF MICROSOFT SURFACE SE FOR EDUCATION

Microsoft Surface Laptop SE has been designed with the sole purpose of making high-quality 1:1 learning possible in your school. It's specialist hardware that can be feasibly introduced without blowing your budgets or sacrificing learning.

Your students deserve a device that goes beyond the slow, unreliable machines that have become the norm. Surface Laptop SE is a different kind of learning device. Faster, reliable, robust and affordable, it's practical for your students and budget-friendly for your school or institution.

Value to schools:

- The robust clamshell design means the Surface Laptop SE is a study companion for the entirety of school life
- Surface Laptop SE is designed to be easily upgraded or repaired
- Streamlined computing that is affordable for schools and parents
- Surface Laptop SE packaging is made from 77% recycled materials, and is 97% recyclable
- It's energy efficient too, with an SE Energy Star certification

THE FINANCIAL CASE FOR 1:1 WITH SURFACE LAPTOP SE

A key part of any major decision, such as committing to 1:1, is budget. If your school can't afford the changes, it isn't viable. Many UK schools are already working with limited finances, which means 1:1 needs to be made affordable in the short term, and as an ongoing cost

Whilst it is more capable than many of its competitors, Surface Laptop SE comes at a competitive price point compared with other leading education-first devices. Microsoft also works with partners to give schools, students and parents access to the technology they need.

For some, purchasing devices might be a viable option. However, with most schools still recovering from the impact of the pandemic, payment plans and leasing are likely to be a more sustainable option.

Microsoft partners, such as Devices for Education, provide affordable leasing plans for schools, with parental donation schemes to help fund your 1:1 journey.

SURFACE LAPTOP SE – INVESTING IN QUALITY

Adopting a 1:1 learning approach is an investment, and when you invest in quality devices that are built to do more and last longer, you save on repairs, hardware updates, technology refreshes and more.

Reliability is an area where affordable education-first devices often fall short of expectations, especially when you consider daily workloads and the need to keep up with students as they learn.

Surface SE has been designed with build quality as a priority, and the financial impacts can be seen as soon as your school starts using the devices.

- Schools who used Surface Laptop SE and Windows SE saw a **17%** reduction in endpoint security.
- These schools also saw a **14%** reduction in mobile device management spend.
- Replacement parts are cost-effective and are easy to fit.

DEPLOY AND UPDATE WITH EASE

At first glance, 1:1 may seem like a nightmare scenario for school network managers and IT admins. However, the increase in devices doesn't have to create an increase in workload.

When Surface Laptop SE devices arrive at your school, they are ready to be deployed out of the box. On average, schools that deploy Microsoft Surface devices running Microsoft 365 see a **20% reduction** in security breaches. Microsoft 365 features such as Windows Defender and SmartScreen help to keep students safe online and block any malicious content.

Through Windows 11 SE, deployment is easier, safer and much more efficient than traditional device rollout. As well as this, adding **Surface Management Portal** to your Microsoft Endpoint Manager admin centre means you'll benefit from one centralised hub to monitor and manage all devices on your school network.

Intune for Education makes updating every student's device as easy as a single click. It lets your IT team prepare devices for remote deployment, so as soon as a student logs on to their device, they already have everything in place to begin learning straight away.

THE MICROSOFT SURFACE FAMILY

Surface Pro 8: The most powerful Pro – Surface 8 combines the power of a laptop with the flexibility of a tablet.

Surface Pro X: The totally mobile Pro – Always with you, instantly ready. Designed to keep up anywhere, at any angle.
