

CloudSMART Solutions

Detection - Compliance - Response

Simplifying the Digital Transformation Journey

SYSTEMS + TECHNIQUES = EFFECTIVE MANAGEMENT

C-STEM provides complementary CloudSMART Solutions

Bridging the gap between actual and target effectiveness in Detection, Compliance & Response

"Detection, Compliance & Response are key areas for Pembroke College in managing cyber security and user experience. C-STEM's drive and expertise in these areas exceeded Pembroke's expectations as a trusted partner"

IT Director
Pembroke College
University of Cambridge

Who are we?

C-STEM is a value-centric Zero Trust Architect (ZTA) MSP that delivers operationalised best-of-breed technologies and complementary services through its purpose-built CloudSMART Digital Ecosystem. Designed to overcome challenges in Detection, Compliance, and Response (DCR), this ecosystem enables organisations to transform their current infrastructure into a secure, agile CloudSMART Zero Trust Digital Infrastructure. C-STEM supports organisations with the accelerated realisation of their targeted Digital Transformation outcomes via the enhanced delivery and maintenance of a secure and consistent user experience for everyone everywhere.

Our Purpose (How we help)

We passionately believe in helping organisations to more easily and confidently match the right technology and services to business needs. Our team of experts do this by helping you to qualify and evidence the fit, improve risk management and deliver projects on time and within budget. Optimised and sustainable outcomes can be achieved, whilst ensuring future proofing, avoidance of redundant investment and fully leveraging ongoing value from assets, resulting in quicker and more effective decision making.

Our Solutions (Technology and Expertise)

C-STEM CloudSMART Solutions empower organisations with the capability to overcome the challenges associated with delivering & maintaining, for all users, a secure, compliant and controlled experience real time. All our CloudSMART Solutions are focused on enhancing DCR capabilities, delivering Security, Productivity & Value Assurance throughout the clients digital transformation journey, enabling the achievement of for the following critical business outcomes:

- Accelerated time to value
- Improved cyber and information security
- Seamless cloud adoption
- Compliance and regulatory alignment
- Enhanced data protection
- Efficient incident response
- Enablement of digital transformation
- Improved workforce productivity

Business Value

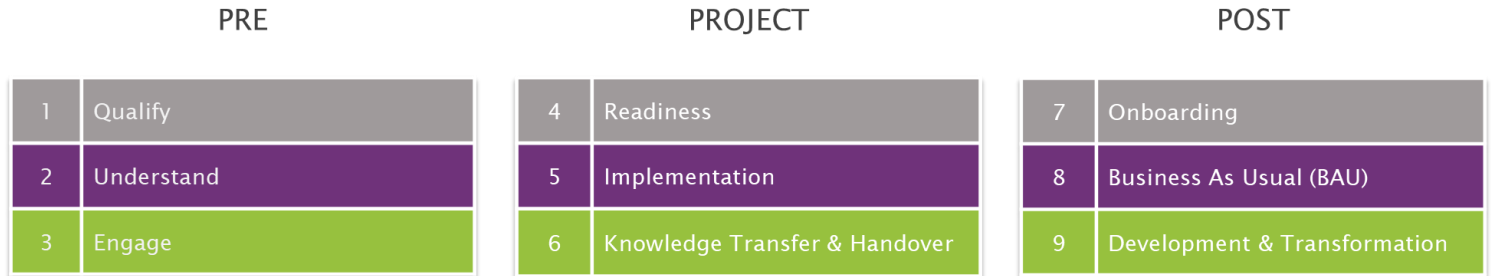

Gap analysis & impact assessment

Our hassle free assessment and report approach, enables organisations to fully understand the true view of the current position and realise greater immediate, intermediate and longer term ROI.

The C-STEM CloudSMART Solutions Journey; simplifying and accelerating digital transformation.

C-STEM has evolved a 9 stage proven framework that ensures standards in quality and provides assurance in productivity and value outcomes, pre, during and after change.

Utilising this framework, we can:

- Confidently match the right technology to business need
- Qualify and evidence the fit
- Improve risk management
- More easily deliver projects on time and within budget
- Ensure business as usual operational efficiency

By doing this, it becomes easier to ensure future proofing and avoidance of redundant investment whilst fully leveraging value at every stage of the journey.

Frictionless Implementation of CloudSMART Solutions
